**COMPANY  
OVERVIEW**

# Evolution of the CIO

The CIO will become the most important executive in the organization. He or she holds the power to unlock a world of opportunity. Collaboration, innovation, and incredible customer experiences all sit within their remit.

But they are often burdened by the past. Limited by a conventional architecture and operating model that was designed by a different team from a distant era. And while visionary, they need to contend with the realities of implementation.

## CIO Challenges We Tackle

## What We Do

Aryaka helps CIOs modernize their infrastructure and simplify operations by converging networking and security in an all-in-one service with an absurdly great customer experience.

## Our Services

Aryaka integrates traditionally siloed network and security products into a unified Secure Access Service Edge (SASE) solution that we deliver as a service. We provide:

- Managed SD-WAN
- SASE
- Secure Web Gateway
- Secure Remote Access
- Global Connectivity
- SaaS Acceleration
- Multi-cloud Connectivity
- Last Mile Services

# Elegance in Simplicity: A Unified SASE

Carriers and hardware vendors have tried to solve the cloud challenge of 'anywhere-applications' in an 'everywhere-world' in much the same way ... with more boxes, more solutions, and ultimately more risk.

But the best solutions are often the simplest. Ones that converge and unify instead of adding layers of complexity. This simplicity is the foundation of Aryaka's Unified SASE.

## Our DNA The Building Blocks

### Network

- SD-WAN
- WAN Optimization
- Private Backbone
- 40+ PoPs
- First | Last Miles
- IaaS, PaaS Connectivity

### Security

- Firewall As-a-Service
- URL Filtering
- Anti-Virus
- Access Control

### Observability

- Unified control plane
- Single portal
- 24x7 NOC
- Stringent SLAs
- Award winning support

## Start with the Right Foundation

### Distributed Data Plane

A cloud-native data plane where the various security functions may be deployed at any edge and in support of any resources

### Unified Control Plane

Central orchestration to properly apply policies consistently across hundreds of locations

### Single Pane Management

Role-based management and observability in support of both network performance and security services

# Performance and Security in the Cloud

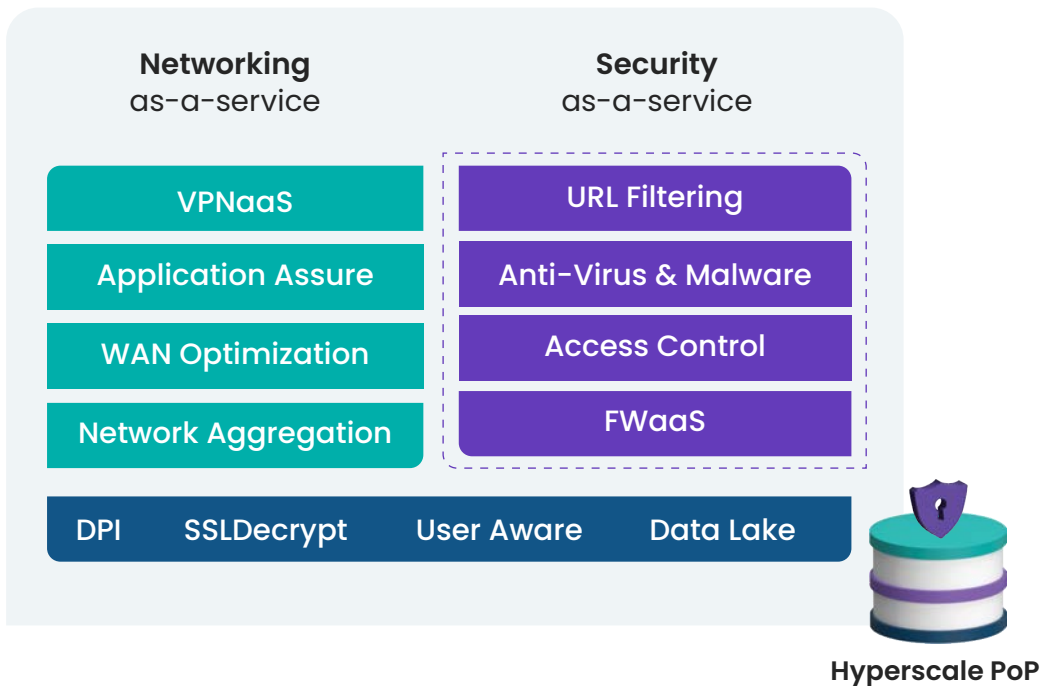

## Applying Zero Trust to the WAN

Zero trust assumes there is no implicit trust granted to assets or user accounts based solely on their physical or network location. It reflects the reality of operating in a cloud-first world with hybrid teams, shifting from network-centric thinking to modern, application-centric models.

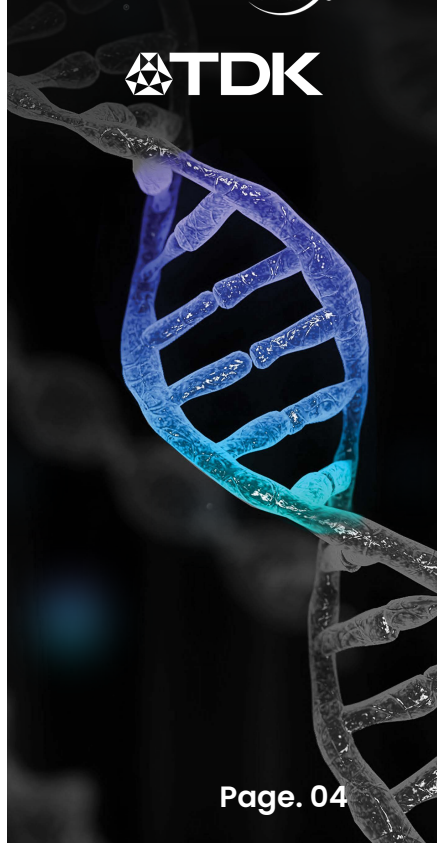

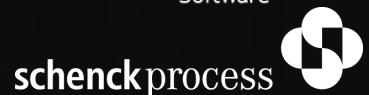

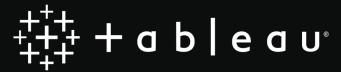

Aryaka is the only provider to apply this framework to the enterprise WAN, knowing that security is only half of the challenge. The other half is the performance of those applications for users, whether they sit in the office or a coffee shop.

## Delivered as-a-Service

Core to our DNA that was born in the cloud is delivering our services, as-a-service.

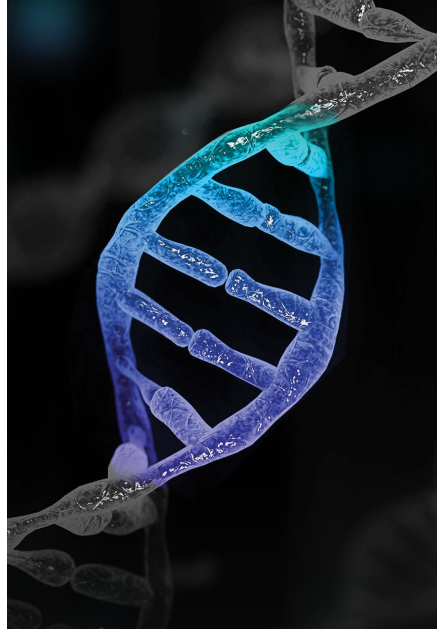

## Our Customers

*"The biggest benefit of Aryaka? Happy users!"*

- Kevin Moonsamy, Arcelik

# Unparalleled Global Infrastructure and Observability

## Global Hyperscale PoP Infrastructure

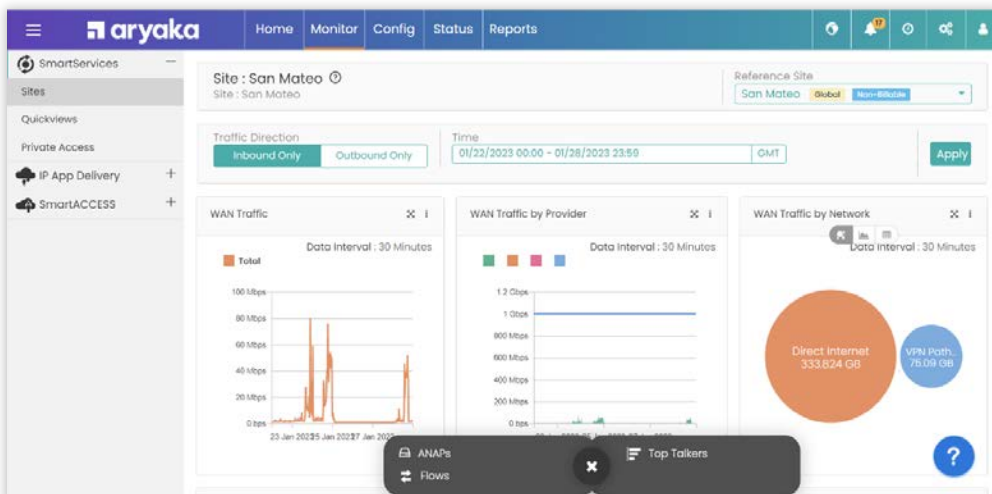

Our layer 2 and layer 3 private backbones are anchored in the cloud, delivering application performance that is better than MPLS - Hyper-resilient to fiber cuts and internet backbone congestion.

## Accelerate Business Applications and Cloud Connectivity

## Single Pane of Glass for Networking, Application Optimization, and Security

The MyAryaka cloud portal delivers real-time access and observability to monitor, configure, and receive status updates with highly granular views.

# Results Matter

## Achieving Business Objectives

Partners and customers don't come to Aryaka for technology. They come to find solutions to business challenges. 'Digital transformation' is really business transformation, and the CIO and IT teams are often at the tip of the spear making it real.

-  **Apps that Work:** Enable cloud services like Microsoft 365 to perform like they are intended
-  **Consolidate Vendors:** Eliminate the complexity and costs of managing multiple vendors, tools, and dashboards
-  **Integrate M&A:** Integrate acquisitions in days and weeks, not months or years
-  **Remove Misconfiguration:** Prevent the preventable with standardized, as-a-service configuration management
-  **Reduce Costs:** Reduce TCO, free-up CAPEX, and unlock the flexibility you need in your budget
-  **Connect Remotely:** Provide remote employees a LAN-like experience no matter where they are

## The Golden Rule

One of our core values is to treat others as we would want to be treated and that starts with the customer experience. We are hyper-focused on delivering an incredible customer experience. It is one of the reasons we were awarded the Gartner Customer Choice for 3 consecutive years.

-  **Gartner Customer Choice**  
**95%**  
Gartner Voice of the Customer for the WAN Edge
-  **Net Promoter Score**  
**65**  
5x the industry average
-  **SLA Backed**  
**99.999%**  
Unmatched performance and uptime

## Why Us?

We're your Team

Security In the Network

We are Cloud

Fast is in Our DNA

We Flex (But in a Good Way)

## Teaming with the Best

We are not in this alone. Incredible partnerships with trusted advisors, systems integrators, and managed services providers are the lifeblood of how we operate.

*"One of the best parts of working with Aryaka is their incredible focus on the customer."*

- Drew Lydecker, President of Avant

*"We chose Aryaka because of the speed of deployment, the simplicity it brings, and the massive cost reduction compared to MPLS."*

- Bruno Stuart-Torrie, Amplexor

*"We've saved approximately 2-3 million dollars over a traditional MPLS solution...We've seen up to 20x increase in file transfer speed."*

- Dustin Collins, Element Solutions

## Where are you in this evolution?

Transformation is not an event ... it's an evolution. Whether you are transitioning from MPLS to SD-WAN, improving IaaS and SaaS performance for remote teams, or considering true SASE solutions, we would love to help on your journey. It's in our genes!

## About Aryaka

Aryaka, the Cloud-First WAN and SASE company, and a Gartner "Voice of the Customer" leader, makes it easy for enterprises to consume network and network security solutions delivered as-a-service for a variety of modern deployments. Aryaka uniquely combines innovative SD-WAN and security technology with a global network and a managed service approach to offer the industry's best customer and application experience. The company's customers include hundreds of global enterprises including several in the Fortune 100.
