

The Report on

Enterprise Network Transformation

2023 Survey

INFOGRAPHIC

The Change We See

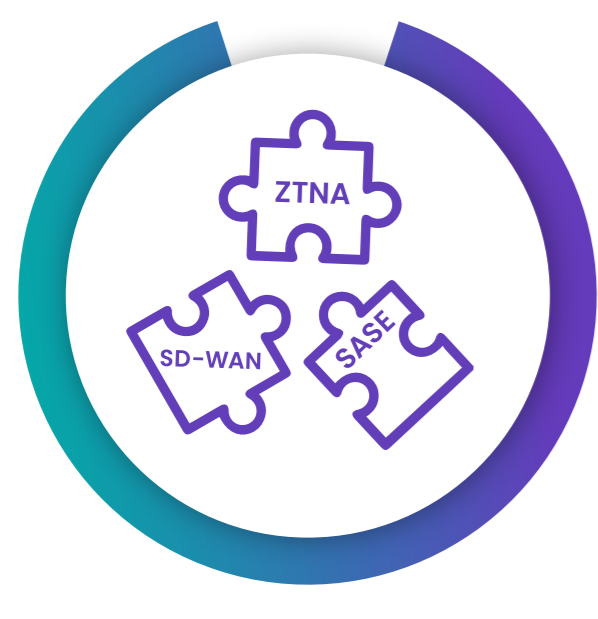

Our world is changing ... fast. And with it, the network security priorities of those enterprises operating in it. We surveyed 230 C-level (50% of respondents), VP (16%), and director-level (34%) leaders at global enterprises in key roles in network and security to learn how this new world was impacting their plans for transformation. The results were fascinating.

98% plan to increase their dependence and investment in **cloud services**

47% will be accelerating their adoption of **cloud and network services**

90% believe that ZTNA is a crucial component of **SD-WAN and SASE services**

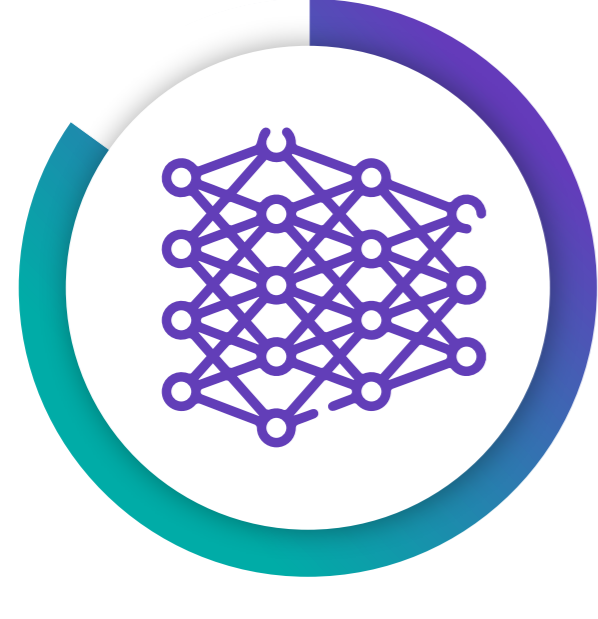

28% are selecting specific cloud and network services to **save costs**

98% said **hybrid work** has increased the need for new network and security solutions

97% need **hybrid work** plans immediately or within the next 12 months

85% feel that the **complexity of networks** is their biggest challenge

65% feel that **knowledge and expertise** is the biggest challenge

35% highlight **network performance** as their most critical area of investment

36% highlight **security** as their most critical area of investment

29% highlight **network monitoring** as their most critical area of investment

94% believe that **SASE will play a larger role** in their network and security plans

29% of respondents rank **ZTNA as either 1st or 2nd priority** for integration for SASE

62% will be **phasing out MPLS**

95% of C-level leaders expect **managed services and network-as-a-services** to play a bigger role in 2023
